

How to Install and Login to the cTrader Platform

1. Download the Platform

To begin, go to the official MondFx website:

<https://www.mondfx.com>

From the Trading menu, select Platforms, then choose and download your preferred version:

cTrader

cTrader is a professional platform designed for Forex and CFD trading. With an advanced UI, very fast execution, and direct market access (True STP), it is a top choice for scalpers and experienced traders.

[Get iOS Version](#) [Get Windows Version](#)

[Get Web App \(PWA\)](#) [Get Android Version](#)

- Windows Version – for desktop computers
- Android Version – for Android mobile devices
- iOS version – for iPhone and Mac devices
- Web App Version - to trade directly from your browser (no installation required)

You can also download it directly from the official **Spotware** website:

<https://www.ctrader.com/platforms>

2. Install the Software

After downloading the installer file cTrader-mondfx-setup.exe, double-click it to start the installation.

The latest version of the platform will automatically install.

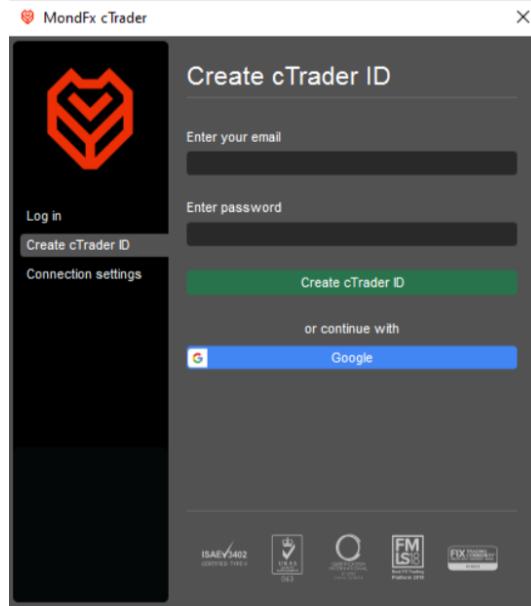

Once the installation is complete, the **MondFx cTrader** icon will appear on your desktop.

3. Login to Your Trading Account

After creating your cTrader account inside your MondFx client area, open the cTrader application.

If this is your first time using cTrader, you'll need to create a cTrader ID.

In the second tab, click Create cTrader ID and use the same email address you registered with MondFx to complete your cTrader ID setup.

If you've already done this before, simply go to the Log in tab and sign in to your cTrader account.

4. Start Trading!

Once logged in successfully, your account balance, instruments, and charts will be displayed.

You're now ready to start trading with MondFx cTrader!
