

MetaTrader 5 Installation and Login Guide

1. Download the Platform

You can download the software through the following link:

<https://mondfx.com/platforms>

MetaTrader 5

MetaTrader 5 is an advanced platform from MetaQuotes Software Corp. It lets you monitor price charts and place trades with ease. MT5 is available with high data processing speed and reliable servers on Windows, iOS, and Android.

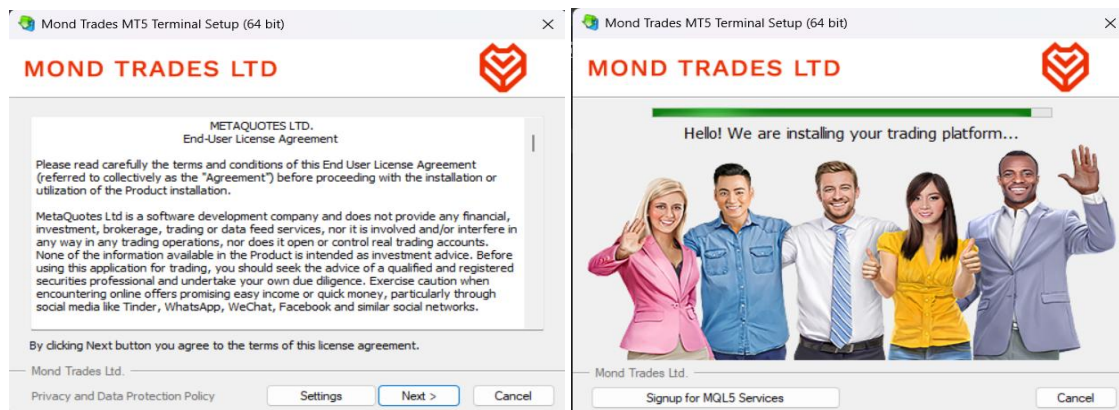

Based on your operating system, you need to download and install the appropriate version. We will proceed with the installation steps next.

2. Installing the Software

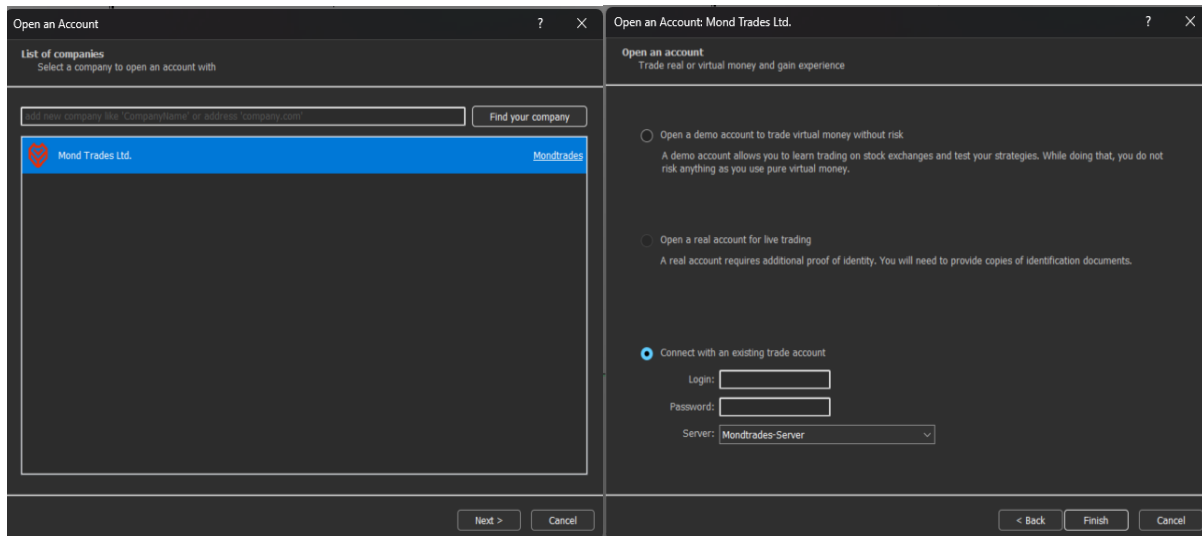

After downloading the file "mondtrades5setup.exe," double-click on it and select "Next."

The latest version of the software will be installed automatically, and at the end of the installation, the MondFx logo will appear on your desktop.

3. Logging into Your Trading Account

After creating your MetaTrader account in the MondFx user panel, follow these steps in the MetaTrader 5 application:

- First, select the server: Mondtrades
- Then, enter your login (account number) and Master password.
- Finally, click the "Finish" button to successfully log into your trading account.

You can now begin your trading.
